

Remove Odors Not Carpet!

Cleans up Smoke, Pet Odors
& VOC's. No Chemicals or
Enzymes. 100% Safe

Ti Clean LLC provides a permanent, cost effective solution for the toughest odors. Our service includes a special TiO2 solution applied directly to floors and walls, and light does the rest. The UV in natural or fluorescent light activates the TiO2 particles destroying odors. Treatments will remain active for a year or more, and is non toxic. Try out this new technology and see for yourself.

Apartments: Once the unit is cleaned and painted we spray in the TiO2 and use air scrubbers and UV lights for 48-72 HRS to accelerate the process. The TiO2 applied will continue to combat odors for a year or more. TiO2 is harmless for humans and pets.

Property Managers

New Technology
Saves
